INDEX TO VOLUME 48

Subject Index

Aborigines, Australian: See Australian aborigines
Absorption through oral mucous membranes 680
Academic performance of sons of dentists during the four-year curriculum 1160T
Acid(s)
  amino: See Amino acid(s)
  aqueous oxalic, the effect of, on surfaces of human enamel 1099*
  formation and enamel solubility, in vitro effects of spice extracts on 916
  glycosaminoglycans and sialic acid content in salivary glands of rats 555
  lactic, determination in aqueous media: application to saliva 1143*
  nucleic, and submaxillary gland protein, changes in, after ethionine administration 192
  organic, the effect of pH and oxygen tension on the nature and amount of, produced by certain oral bacteria 1105*
  plasmatic sialic, effects of sialadenectomy on, concentration in rats 1076*
  produced by oral streptococci on cereal substrates 928
  production, the reproducibility of human, unhomogenized, dental plaques by 1106*
Acrylic resins, chemically polished sorption of heat-cured 1072*
Adenosine triphosphatase in cells associated with bone repair, the histochemical demonstration of 1089*
Adhesives, dental, static load testing of 211
Adrenal corticosteroids: See Corticosteroids, adrenal
Adrenocortical hormones: See Hormones, adrenocortical
Adult population, British, tooth loss and prosthetic status in a 1125*
Aerobiology, dental, studies on: I. Bacterial aerosols generated during dental procedures 49
Aerosol production by the air-turbine handpiece, study of some factors contributing to 341
Aerosols, bacterial, generated during dental procedures. Studies on dental aerobiology: I. 49
Age
  and sex role in rat salivary gland calcium and mucopolysaccharide content 1078*
  changes produced by, in the protein content of the brain and liver 1160T
  dependent changes of certain peptide hydrolases and dehydrogenases in bovine dental pulp 951
  effect of, on crowding and spacing within the dental arch 1102*
Air-turbine handpiece, study of some factors contributing to aerosol production by the 341
Alcohol and cigarette smoke, effect of, as promoting agents in hamster pouch carcinogenesis 1200
Alkaline phosphatase and bone 1149T
Alloy(s): See listings for special types, i.e. Gold; Amalgam, etc.
Alveolar apophyses of captive monkeys, bone defects in 1082*
Alveolar-bone and root growth, patterns of, associated with development and eruption of teeth in rhesus monkeys 251
Amalgam, dental
  and cements, studies on the tensile strength of 1111*
  dynamic creep of 501
  early strength of, as influenced by pins 489
  microanalysis of copper-tin phases in 872
  phase interfaces in 1091*
  spherical alloy, effect of compaction technic and mercury:alloy ratio on the adaptation of 879
Amalgam restorations, compound, sectional matrix for 1072*
Amalgam-tooth interface, analyses of the, using the electron microprobe 317
Amalgamator motions, an investigation of 1091*
Amalgams
  derived from a spherical and a conventional alloy, a comparison of the physical properties of 1123*
  physical properties of spherical alloys for 1072*
Amebas, chemotaxis in small free-living 1089*
Ameloblasts, secretory, ultrastructure of cytoplasmic changes in 1075*
Amelogenesis
  autoradiographic electron microscopy of protein synthesis during 1139*
  newt, 3H amino acid uptake in 1117*
Amino acid composition
  and electrophoretic patterns of the lipophilic and lipophobic protein components of bovine fetal enamel matrix 1107*
  neutral and acid soluble collagens, and mucopolysaccharides. Effect of ascorbic acid on guinea pig skin collagen synthesis: II. 83
  of dental plaque from *Macaca irus* 1115*
3H amino acid uptake in newt amelogenesis 1117*
Amino acids in human dental plaque, a micromethod for the determination of 1315††
Ammonium chlorides, adsorbed long-chain, the retardation of enamel dissolution rates by 509

* abstract
** IADR abstract No. printed separately from *Journal*
T title
†† annotation
Commemorative Supplement (paged seperately): See page 1361 of Index.

Amylase assay, an improved 483††
Analgesic properties of a new drug and codeine, comparative evaluation of the 410
Anatomy, comparative and phylogeny, of oral ectodermal-ectomesenchymal inductive interactions 732
Anchoring fibrils in the attachment of epithelium to connective tissue in oral mucous membranes 144
Anesthesia
local, sedation of patients with intravenous diazepam before minor oral surgical procedures under 1121*
of the pig for experimental dental work 1103*
Anesthetic cartridges, local, contamination of 1121*
Anesthetic solutions, local, a comparison of 2% lignocaine, containing epinephrine 1:80,000 and 1:250,000 1120*
Anesthetics, topical, in dentistry, an evaluation of lignocaine 1092*
Angular measurements obtained from radiographic cephalometric analysis, accuracy of 595††
Animal(s)
calculus: methods of evaluation and of dietary production and control 1185
experimental, for caries research, the use of the ferret as an 1129*
experimental, primates as. Some new approachs to cleft palate resarch: 1160T
fate of calcium injected intravenously in 1149T
laboratory, histologic correlations between development of the dental lamina and the face in 1138*
Ankylosis, experimental alveolodental, in rats 1081*
Anthropoidea, mandibular index in 1074*
Anthropologic and forensic study of maxillary canines. Variation in form of human teeth: II. 173
Anthropologic and forensic study of maxillary incisors. Variation in form of human teeth: I. 5
Antibiotic treatment, topical, of infected dental pulps of monkeys 351
Antibiotics, certain, the bacterial flora of infected root canals and their sensitivity to 1157*
Antibodies and viruses, the case for. Some new approaches to cleft palate research: 1160T
Antibody production in splenectomized rats following intragingival immunization 1086*
Anticariogenic effect of sodium fluoride 965††
Anticariogenic efficacy and skeletal retention of fluoride when administered in the presence of a prenatal vitamin-mineral supplement 1224
Antihuman lymphocyte serum, suppression of in vitro lymphocyte cytotoxicity in Mikulicz's recurrent oral aphthae with 1114*
Antilactobacillus agent in saliva, factors which influence the assay of the 22
Antimere symmetry in human dental morphology 1156*
Antimicrobial activity of disclosing agents, a comparison of the 913
Antimicrobial control of bacterial plaque and calculus and the effects of these agents on oral flora 832
Anxiety scale, dental, development of a 596††
Apatite, the effect of various ions on the precipitation of 1129*
Apatitic nuclei in hard tissue and salivary stone formation analyzed by electron microscopy and diffraction 1140*
Aphthae, Mikulicz's recurrent oral
effect of sera and lymphocytes upon oral epithelial cells in tissue culture 1134*
quantitative changes in the mast cell population in 901
Aphthae, recurrent, and leukoplakia, comparative cytologic studies in patients with 271
Argentina, Southern, occlusal influence on temporomandibular joint morphology in natives of 1075*
Ascorbic acid, effect of, on guinea pig skin collagen synthesis:
I. Total collagen 863
II. Neutral and acid soluble collagens, mucopolysaccharides, and amino acid composition 83
Ascorbic acid, oxygen, and hydrocortisone, influence of, on mouse mandible cultured in vitro on a chemically defined medium 1116*
Ash, calcium, phosphorus, and fluoride content of enamel of molars in hamsters, effect of desalivation on the 326††
Atmospheric conditions, the effect of, on rheological properties. Zinc oxide-eugenol cements: I. 883
Atrophy, progressive, and expulsion of upper rat incisor after prolonged vitamin-A deficiency 330††
Atropine and isoproterenol action on rat salivary gland calcium and mucopolysaccharide content 1078*
Attrition
and occlusal contact, role of, in the physiology of the rat incisor: IV. Prevention of attrition in the articulating incisor 120
prevention of, in the articulating incisor. Role of attrition and occlusal contact in the physiology of the rat incisor: IV. 120
Australian aborigines and whites, third-molar development in 1083*
Autoimmunity and breach of the blood-epithelial barrier 685
Autoradiographic demonstration of DNA synthesis in selected epithelial tissues in male rats 1219
Autoradiographic study of ^{3}H-proline uptake in the palate of normal mice and in the palate of mice treated with hydrocortisone 1039
Autoradiography, cover-slip, method for 598††
Awards competition, Edward H. Hatton, papers winning the 1037

B vitamins, selected, in saliva, radioisotopic studies of the glandular contribution of 579

Baboons, dietary carbohydrates and calculus deposits in 1101*
Bacteria
human oral, a relationship between, and the menstrual cycle 1130*
salivary, the effect of Na2FPO3 on 1085*
Bacteria, oral
comparative study of circulating and cell-mediated immunity induced by the gingival and systemic administration of 1098*
effect of pH and oxygen tension on the nature and amount of organic acid produced by certain 1105*
Bacterial aerosols generated during dental procedures. Studies on dental aerobiology: 1. 49
Bacterial flora
of infected root canals and their sensitivity to certain antibiotics 1157*
of the healing wound, the effect of different types of periodontal surgical dressings on the 1104*
Bacterial invasion of carious dentin, the pattern of 1099*
Bacterial populations of selected tooth surface sites 67
Bacteriophage virulent for species of the genus *Bacteriodes* 599††
Bacteroides, bacteriophage virulent for species of the genus 599††
Bantu, permanent dentition of the, an investigation into the anteroposterior curve in the 1158*
Benzoate: See Estradiol benzoate
Betel-nut chewing, the effects of, on the buccal mucosa of 296 Indians and Malays in West Malaysia 1112*
Bioelectric phenomena in dental decay 795
Bioelectric properties of the tooth 789
Biological changes at the tooth-saliva interface in periodontal disease 846
Biometric evaluation
of gingivectomy technic 1069*
of operations of gingival extension with periosteal fenestration 1069*
Biometric study. Lateral sliding flaps: 1070*
Blood
and urinary fluoride levels in humans associated with ingestion of sodium fluoride-containing vitamin tablets 1211
groups A and B in oral epithelium of young and old men 266
vessels, small, in human nondiabetic and diabetic gingiva, observations of 967††
Blood citrate level(s)
and periodontal condition in pregnant women 140
and periodontal disease in patients with trisomy 21 1231
Blood-citrate and calcium levels, effect of coenzyme Q on, and on the periodontium of citrated rats 1264
Blood-epithelial barrier, autoimmunity and breach of the 685
Bone
alkaline phosphatase and 1149T
crystals and organic matrix, the ultrastructural interface of, in woven and lamellar endochondral bone 781
defects in alveolar apophyses of captive monkeys 1082*
deposition and resorption, studies in 1088*
development, autoradiographic electron microscopy of collagen synthesis during 1137*
fractures, the effect of ultrasound on healing of 1081*
model of the circulation in 1160T
osteogenic response after the local application of fluoride to 1157*
periodontal, combined effect of trauma from occlusion and orthodontic movement in, response 1082*
primary membrane, scanning electron microscopy and microradiography of 1118*
regeneration in periodontium after fixed splinting 1070*
remodeling dynamics after intraperitoneal administration of radioactive sodium phosphate (^{32}P) 909
repair, the histochemical demonstration of adenosine triphosphatase in cells associated with 1089*
tissue reconstruction in normal and partially edentulous mandibles of the dog 1137*
transplants, autogenous, in the treatment of periodontal pockets of one and two bony walls: I. coronal migration of the bottom of the pocket 1070*
woven and lamellar endochondral, the ultrastructural interface of bone crystals and organic matrix in 781
Bone and dentin
electrical response of 1090*
heterotopic, formation produced by transplant of dental pulp in the rabbit 1142*
incisor, rat, electron microscopy of the calciotraumatic response in, to parenteral and oral administration of tetracycline 521
Bone-remodeling dynamics following local X irradiation:
I. 376
II. 904
Bovine dental pulp: See Pulp—bovine dental
Bovine enamel: See Enamel bovine
Bovine enamel matrix: See Enamel matrix, bovine fetal
Brain and liver, changes produced by age in the protein content of the 1160T
Brisbane: See Children—Brisbane school
British adult population, tooth loss and prosthetic status in a 1125*
Buccal and lingual pressures acting on teeth, comparison of 1131*
Buccal mucosa, the effects of betel-nut chewing on the, of 296 Indians and Malays in West Malaysia 1112*
Butyl cyanoacrylate
healing of skin wounds with 294
tissue response to a dental cement containing 57
n-Butyl-α-cyanoacrylate mixtures, properties of 536

^{45}Ca and tetracycline in quantitative studies of mandibular growth in the rat 1136*
Ca/Sr discrimination 1090*

Calcemia, improvement in a direct colorimetric method for 1079*
Calcified tissues
noncarious enamel and dentin and, in mottled teeth, electron probe microanalysis of 131
rat, relation between the fluoride contents of 947
Calcifying fluids, the use of, on enamel before the formation of caries-like lesions in vitro 1129*
Calcium
and blood-citrate levels: See Blood-citrate and calcium levels
apatites, and electron microscope and nuclear magnetic resonance study of 1089*
ash, phosphorus, and fluoride content of enamel of molars in hamsters, effect of desalivation on the 326††
concentration of the submaxillary and retrolingual gland after autonomic denervation in rats 1075*
hydroxide and tetracycline-L-metilenlysine, effect of, on healthy, experimentally exposed rat molar pulps 1080*
injected intravenously in animals, the fate of 1149T
oxide and EDTA mixtures, characteristics of 1071*
relationships, maternal-fetal, evidence of thyrocalcitonin in guinea pig and its effects on 307
Calcium and mucopolysaccharide content
age and sex role in rat salivary gland 1078*
rat salivary gland, atropine and isoproterenol action on 1078*
Calculi, dental, variations in composition and structure 1216
Calculus
and bacterial plaque, antimicrobial control of, and the effects of these agents on oral flora 832
animal: methods of evaluation and of dietary production and control 1185
dental, in lathyritic rats 966††
deposits and dietary carbohydrates in baboons 1101*
Callus, hard, in the healing of dental root fractures, histomorphologic assessment of the three possible patterns of 1143*
Calorimetric analysis of commercial and dental waxes 1165
Calxyl, reaction of human dental pulp covered with, with or without zinc oxide-eugenol 1149T
Candida in denture stomatitis, the distribution of 1122*
Candida albicans
germ-tube formation by 230
incidence of delayed hypersensitivity to, in patients with denture stomatitis 1134*
Canine field model, directionality in the 1310††
Canines, maxillary, an anthropologic and forensic study of. Variation in form of human teeth: II. 173
Carbohydrates
dietary, and calculus deposits in baboons 1101*
plaque formation and implantation of *Odontomyces viscosus* in hamsters fed different 824
Carcharhinus milberti (shark), dentin of: a comparative histological and histochemical study 196
Carcinogenesis, effect of alcohol and cigarette smoke as promoting agents in hamster pouch 1200
Carcinoma
medulary, of the thyroid in a patient with bilateral pheochromocytoma, a case of 1149T
squamous, of the lip: a study of the interface between neoplastic epithelium and the underlying mesenchyma 702
Caries
and plaque system, an experimental 1116*
plaque formation and composition with reference to 1155*
research, the use of the ferret as an experimental animal for 1129*
Caries, dental
and salivary glands in female rats, effect of graded doses of estradiol benzoate on 485††
biochemical studies on the formation and composition of dental plaque in relation to: extracellular polysaccharides 811
clinical, in Brisbane school children, the comparative effect of three fluoride dentifrices on. Preliminary report 1094*
growth, and third-molar eruption in rats, influence of marginal and complete protein deficiency for varying periods during reproduction 310
in deciduous molars, pulpal and dentinal response to 1127*
in pancreatectomized rats, effect of insulin and oral hypoglycemic drugs on 1079*
prevalence of, in deciduous teeth 1067*
rampant, the induction of, in monkeys (Macaca irus) 1097*
serum antibodies in 1097*
Caries, dental, incidence
in children after topical stannous fluoride applications 1068*
in female rats, effect of some contraceptive steroids on growth and development of salivary glands and 477
in the rat, influence of corticosterone on the integrity of salivary glands and the 467
Caries, dentinal, deep, biochemical and antigenic studies of lactobacilli isolated from: I. Biochemical aspects 356
Caries prevalence
and fluoride content of teeth extracted in high- and low-fluoride towns 1129*
in deciduous teeth of twins 1068*
in high- and low-selenium areas 1152*
of deciduous teeth, a comparison of the effects of early feeding habits on the 1124*
Caries-free and caries-active individuals, a study of some factors influencing phagocytosis of cariogenic streptococci by 842
Caries-like lesions in vitro, the use of calcifying fluids on enamel before the formation of 1129*

Cariogenic and other oral streptococci, taxonomy of 1105*
Cariogenic potential of streptococcus No. 167 in germ-free rats 1313††
Cariogenic streptococci, fluorescent antibody (FAB) identification of 1106*
Cariostatic effect of 1% sodium dihydrogen phosphate and disodium hydrogen phosphate added to presweetened breakfast cereals, North Dakota field test of 1308††
Cariostatic effects of sodium trimetaphosphate and sodium fluoride when fed separately and together in diets of rats, longitudinal study of 183
Carious lesions
microsampling of enamel from the histological zones of 1128*
ultrastructural, in clinically normal teeth 1145*
Cast and teeth, vertical movement of the, during packing 1073*
Cast materials, fidelity of reproduction of 1071*
Castings, retention of, the effect of dentin roughness on the 1111*
Castration
effect of, on response to parathyroidectomy in female rat salivary glands 1078*
parasympathetic denervation, and testosterone propionate on the submaxillary glands in C_3H mice, effects of 1077*
Cat
innervation of temporalis muscle in the, electrophysiologic analysis of 327††
jaw-closing reflex in the 1099*
Cavity preparation and restoration, scanning electron microscopy of 1123*
Cell
cultures, biologic behavior of xylocaine on 1146*
(death, programmed) electron microscopic and histochemical examination of oral epithelial-mesenchymal interaction 652
numbers in pulps of rodent incisors and molars, comparison of 597††
proliferation in gingival explants in vitro 1116*
Cell-cycle characteristics in the epithelium of hamster cheek pouch and palate 1113*
Cell-wall composition and antigenic structure of the genus *Leptotrichia* 1133*
Cells
mast: See Mast cells
mononuclear, in delayed hypersensitivity reaction of oral mucosa, studies on the origin of 689
of developing teeth, ^{3}H-proline uptake by the 257
submaxillary, secretory activity of, in culture 1116*
Cells, oral epithelial
hormonal effects on 1113*
superficial, gram-staining mechanism of 392
Cellular density and labeling index in palatine shelves of cleft-palate mice 263
Cellular dynamics in root formation of teeth in rhesus monkeys 114
Cement(s), dental
and amalgam, studies on the tensile strength of 1111*
clinical studies of: II. Further investigation of two zinc oxide-eugenol cements for temporary restorations 366
containing butyl cyanoacrylate, tissue response to a 57
plastic, tissue reaction to root canal fillings with 1080*
silicate: VIII. Acid-base aspect 412
silicate, structure of, by electronprobe analysis 1109*
Cements, zinc oxide-eugenol
durability of 1110*
I. The effect of atmospheric conditions on rheological properties 883
Cementum, coronal, scanning electron microscopy of 1119*
Centric relation, unicity of the 1069*
Cephalometric study of the cranial base in children with endocrinopathies in relation to the craniofacial complex 1160T
Cephalometric study of craniofacial development in rabbits with impaired masticatory function 1268
Cephalometry, three-view x-ray, of primates 1312††
Cereal substrates, acids produced by oral streptococci on 928
Cereals, presweetened breakfast, North Dakota field test of cariostatic effect of 1% sodium dihydrogen phosphate and disodium hydrogen phosphate added to 1308††
Cerebral palsy, prevalence of enamel hypoplasia in children with 1079*
Cheek and tongue, the effect of the, on the mesial migration of teeth 1096*
Chemical and histologic composition, method for the correlation of 38
Chemotaxis in small free-living amebas 1089*
Chick chorioallantois, a study of mouse tooth development on the. Inductive changes in early tooth development: I. 719
Child-centered teaching program in oral hygiene instruction, an assessment of a 1133*
Children
Brisbane school, the comparative effect of three fluoride dentifrices on clinical dental caries in. Preliminary report 1094*
in a nonfluoride and a fluoride community, hematologic values of 1145*
incidence of dental caries in, after topical stannous fluoride applications 1068*
with cerebral palsy, prevalence of enamel hypoplasia in 1079*
with endocrinopathies, cephalometric study of the cranial base in, in relation to the craniofacial complex 1160T
Chlorhydroxyapatites, infra-red spectra of 1120*
Chorioallantois, chick, a study of mouse tooth development on the. Inductive changes in early tooth development: I. 719
Chromatographic separation of ether-extractable components of aerobically incubated human whole saliva 601††
Cigarette smoke and alcohol, effect of, as promoting agents in hamster pouch carcinogenesis 1200
Cinemicrographs of vital pulp with fiberoptics 329††

Circulation in bone, a model of the 1160T
Citrate in the surface enamel of unerupted and erupted teeth 105
Citrate level(s): See Blood citrate level(s)
Civatte or colloid bodies in lichen planus, the nature of 1112*
Cleft palate
anomalies, differential analysis of 1042
condition in man: epidemiology, genetics, and embryology 1160T
meclozine-induced, ultrastructure of the palatal epithelium of rat embryos with 1127*
nasal airflow as an index of success of prosthetic management of 368
production, experimental teratology: types of experiments and mechanisms involving 1160T
Cleft palate research, some new approaches to case for viruses and antibodies 1160T
primates as experimental animals 1160T
Cleft-palate mice: See Mice—cleft-palate
Clostridia, oral 1158*
Closure of the embryonic rat palate in vitro with the effects of certain chemicals, study of 568
Cocoa as a limiting factor on the microbial population of saliva 1309††
Codeine, comparative evaluation of the analgesic properties of a new drug and 410
Coenzyme Q, effect of, on blood-citrate and calcium levels and on the periodontium of citrated rats 1264
Collagen
dentin, some preliminary investigations of the chemistry of 1109*
restoration in healing human gingiva 27
synthesis during bone development, autoradiographic electron microscopy of 1137*
Collagen fibers
in immature enameloid of dogfish teeth 1119*
longitudinal, in gingiva 1100*
Collagen, guinea pig skin, synthesis, effect of ascorbic acid on:
I. Total collagen 863
II. Neutral and acid soluble collagens, mucopolysaccharides, and amino acid composition 83
Collagenase, in periodontal tissues of man, the origin of 646
Collagens, neutral and acid soluble, mucopolysaccharides, and amino acid composition. Effect of ascorbic acid on guinea pig skin collagen synthesis: II. 83
Colloid or Civatte bodies in lichen planus, the nature of 1112*
Colorimetric method for calcemia, direct, improvement in a 1079*
Composite materials, X-ray-opaque reinforcing fillers for 79
Computer technic, serial growth analysis: 1083*
Computer-aided cluster and discriminant analyses of the histologic features of some oral mucosal lesions 1096*
Condylar growth in rhesus monkeys 1171
Connective tissue: See Tissue, connective
Contamination of local anesthetic cartridges 1121*
Copper localization on the root surface of a tooth 970††
Copper-tin phases in dental amalgam, microanalysis of 872
Cornification of oral epithelium, study of, by phase microscopy 274
Corticosteroids, adrenal, in submaxillary fluid 448
Corticosterone, influence of, on the integrity of salivary glands and the incidence of dental caries in the rat 467
Cover-slip autoradiography, method for 598††
Cranial base in children with endocrinopathies, cephalometric study of the, in relation to the craniofacial complex 1160T
Craniofacial complex, cephalometric study of the cranial base in children with endocrinopathies in relation to the 1160T
Craniofacial development in rabbits with impaired masticatory function, a cephalometric study of 1268
Cross-reactivity of human and rat cariogenic streptococci in dentin 488††
Crowding and spacing within the dental arch, effect of age on 1102*
Crown
and gold inlay restorations, base materials for 1091*
posts, the effect of impact and tensile forces on 1122*
Crown-size profile pattern, effect of agenesis on the 1314††
Crustacean bioadhesive secretions 1124*
Cryogenic surgery, ultrastructural changes in oral epithelium following 1118*
Crystallographic evaluation of enamel from carious and noncarious teeth 1280
α-Cyanoacrylate-*n*-butyl mixtures, properties of 536
Cysts, epithelial jaw: a clinicopathological reappraisal 1098*
Cytogenetic studies of normal and cleft-palate epitheliums in mice 590
Cytologic changes, exfoliative, in oral leukoplakia 17
Cytologic evaluation of physiotherapy after gingivectomy 600††
Cytologic studies, comparative, in patients with recurrent aphthae and leukoplakia 271
Cytological aspects of the attached epithelium of the human gingiva 1142*

Danes, medieval, incidence of congenitally absent teeth in 1125*
Decay, dental: See Dental decay
Deciduous dentition: See Dentition
Deciduous tooth or teeth: See Tooth, deciduous; Teeth, deciduous
Degradation phenomena of connective-tissue ground substances 1139*
Dehydrogenases and peptide hydrolases in bovine dental pulp, age dependent changes of certain 951
Delayed hypersensitivity reaction of oral mucosa, studies on the origin of mononuclear cells in 689
Demineralization
of enamel in cooked food-saliva mixtures 282

of extracted teeth by means of EDTA 1159*
of human dental enamel, x-ray study of the 1127*
studies of fluoride-treated enamel using scanning electron microscopy 1296
Denervation
parasympathetic, castration, and testosterone propionate on the submaxillary glands in C_3H mice, effects of 1077*
sympathetic and parasympathetic, effect of, on the structure of submaxillary glands in rats 1076*
Dental adhesives: See Adhesives, dental
Dental arch
comparison between the right and left sides of the 971††
crowding and spacing within the, effect of age on 1102*
Dental calculus: See Calculus, dental
Dental caries: See Caries and related headings
Dental decay, bioelectric phenomena in 795
Dental disease
among the Navajo Indians of Monument Valley, Utah, incidence of 328††
the prevalence of, in trisomy-21 (mongolism) 1150*
Dental enamel: See Enamel and various extensions, i.e. Enamel, dental; Enamel, human, etc.
Dental fitness, occupational status, and sex in New Zealand adolescents and young adults 1154*
Dental lamina and the face in laboratory animals, histologic correlations between development of the 1138*
Dental morphology, human, antimere symmetry in 1156*
Dental plaque: See Plaque(s), dental
Dental porcelain: See Porcelain(s), dental
Dental procedure, simulated, response to sight and sound in a 160††
Dental pulp: See Pulp and related entries
Dental stone, investigation on the expansion of 206
Dentifrice abrasivity in vivo, the assessment of 1122*
Dentifrices, fluoride, the comparative effect of three, on clinical dental caries in Brisbane school children. Preliminary report 1094*
Dentin
collagen, some preliminary investigations of the chemistry of 1109*
hardness, effect of pulpectomy on 452
in parathyroidectomized rats, histochemical study of 1251
of *Carcharhinus milberti* (shark): a comparative histological and histochemical study 196
powdered sound, reactions of, with several fluoride solutions 149
root, microhardness of sound and gangrenous 1141*
roughness, the effect of, on the retention of castings 1111*
Dentin and bone
electrical response of 1090*
heterotopic, formation produced by transplant of dental pulp in the rabbit 1142*
Dentin and enamel: See Enamel and dentin
Dentin, carious
electron microscopic study of 1119*
fat staining in 109
pattern of bacterial invasion of 1099*
Dentin, human
and rat cariogenic streptococci in, cross-reactivity of 488††
mechanical properties of, in shear 1123*
transduction of hydrostatic pressure to electric potential in 226
Dentin, reparative
histochemical study of 1080*
tetracycline labeling of 154††
Dentinal and pulpal response to dental caries in deciduous molars 1127*
Dentinal caries: See Caries, dentinal
Dentinogenesis imperfecta: genetic variations in a six-generation family 1196
Dentists
sons of, academic performance of, during the four-year curriculum 1160T
young, hearing loss at level of 4 and 8 kc in 1072*
Dentition
developing deciduous, the composition of the, in relation to fluoride in tissue fluids 761
of the pig, features of the, for experimental work 1103*
permanent, of the Bantu, an investigation into the anteroposterior curve in the 1158*
Dentogingival junction, the effect of alterations in external environment on the 671
Denture stomatitis, the incidence of delayed hypersensitivity to *Candida albicans* in patients with 1134*
Desalivation, effect of, on the ash, calcium, phosphorus, and fluoride content of enamel of molars in hamsters 326††
Diazepam, intravenous, sedation of patients with, before minor oral surgical procedures under local anesthesia 1121*
Die stones, factors influencing the surface hardness of 1110*
Dietary carbohydrates and calculus deposits in baboons 1101*
Dietary consistency, effect of, upon rat incisors 156††
Diets
of rats, longitudinal study of cariostatic effects of sodium trimetaphosphate and sodium fluoride when fed separately and together in 183
with high and low potentials, influence of alternating feedings of, to cause the periodontal syndrome in rice rats 486††
Digestion, enzymatic, the epithelial-connective tissue junction as seen after 630
Digital vasomotor hypotonicity, apparent, in the remission stage of acute necrotizing ulcerative gingivitis 431
7,12-Dimethylbenz-(α)-anthracene, incidence of induced tumors in the rat sub-mandibular gland with different doses of 1316††
Disclosing agents, a comparison of the antimicrobial activity of 913
Disclosing solutions, the inhibitory effect of, on plaque growth and culture 1100*

Disodium hydrogen phosphate and 1% sodium dihydrogen phosphate added to presweetened breakfast cereals, North Dakota field test of cariostatic effect of 1308††
DNA synthesis in selected epithelial tissues in male rats, autoradiographic demonstration of 1219
Dog
bone tissue reconstruction in normal and partially edentulous mandibles of the 1137*
influence of 226Ra and 239Pu on the dental root canal of the 924
Dogfish teeth, collagen fibers in immature enameloid of 1119*
Dogs
dental eruption chronology in: deciduous tooth gingival emergence 1177
lymphatic vessels of the dental pulp in 959
Dogs, suckling
osteometry of facial bones from: reliability of a radiographic and a direct method 158††
tooth-eruption ages in, as affected by local heating 427
Dwarfs, hypophysial, a measurement of the total head growth during administration of human growth hormone to 1160T
Dynamic creep of dental amalgam 501
Dysplasia, early, of the hamster cheek pouch, histologic study of the effect of 5-fluorouracil on chemically induced 157††

Ectodermal-ectomesenchymal inductive interactions, oral, phylogeny and comparative anatomy of 732
Ectomesenchymal-ectodermal inductive interactions, oral, phylogeny and comparative anatomy of 732
Edentulous jaws, x-ray survey of 1069*
Editorial news and views 3, 171, 339, 499, III, 1163
EDTA
and calcium oxide mixtures, characteristics of 1071*
demineralization of extracted teeth by means of 1159*
treated enamel, scanning electron microscope studies of 1234
Eh in relation to salivary fusiforms 1105*
Elastic fibers, further evidence for the absence of, during movement of the palatal shelves in mice 155††
Elastomeric mold liners in the production of porosity-free polymethyl methacrylate 61
Electric potential in human dentin, transduction of hydrostatic pressure to 226
Electron microprobe, analyses of the amalgam-tooth interface using the 317
Electron microscope, scanning
studies of dental enamel 242
studies of EDTA-treated enamel 1234
Electron microscopic and histochemical examination of oral epithelial-mesenchymal interaction (programmed cell death) 652
Electron microscopic study of carious dentin 1119*
Electron microscopy
and diffraction, apatitic nuclei in hard tissue and salivary stone formation analyzed by 1140*
of enamel formed in the presence of fluoride and molybdenum 1303
Electron microscopy, autoradiographic
of collagen synthesis during bone development 1137*
of protein synthesis during amelogenesis 1139*
Electron microscopy, scanning
and microradiography of primary membrane bone 1118*
demineralization studies of fluoride-treated enamel using 1296
of cavity preparation and restoration 1123*
of coronal cementum 1119*
Electron probe
analysis, structure of dental silicate cement by 1109*
and x-ray diffraction microanalyses of human dental enamel treated in vitro by fluoride solution 1145*
microanalysis of noncarious enamel and dentin and calcified tissues in mottled teeth 131
Electrophysiologic analysis of innervation of temporalis muscle in the cat 327††
Embryogenesis, human, the time-structure relationship of tooth development in 745
Embryologic relationships between neuroectoderm, pharyngeal membrane, Rathke's pouch, and notochord in the human 1160T
Enamel
carious, histologic and ultrastructural features of remineralized 766
citrate in the surface, of unerupted and erupted teeth 105
demineralization mechanisms, quantitation of: III. A critical examination of the hydroxyapatite model 396
demineralization of, in cooked food-saliva mixtures 282
dissolution rates, retardation of, by adsorbed long-chain ammonium chlorides 509
EDTA-treated, scanning electron microscope studies of 1234
fetal bovine, characterization of protein fractions present in 1109*
fluoride-treated, demineralization studies of, using scanning electron microscopy 1296
formed in the presence of fluoride and molybdenum, electron microscopy of 1303
from carious and noncarious teeth, crystallographic evaluation of 1280
from the histological zones of carious lesions, microsampling of 1128*
hypoplasia in children with cerebral palsy, prevalence of 1079*
internal surface and pore structure of 771
matrix, bovine fetal, the amino acid composition and electrophoretic patterns of the lipophilic and lipophobic protein components of 1107*
of molars in hamsters, effect of desalivation on the ash, calcium, phosphorus, and fluoride content of 326††
pellicle, acquired, some observations on hu-

man saliva proteins and their role in the formation of the 806
solubility and acid formation, in vitro effects of spice extracts on 916
use of calcifying fluids on, before the formation of caries-like lesions in vitro 1129*
young transitory, in various reptiles 1138*
Enamel and dentin
lipid composition of 1107*
noncarious, and calcified tissues in mottled teeth, electron probe microanalysis of 131
Enamel, dental
human, X-ray study of the demineralization of 1127*
investigations on the adhesion of stainless steel orthodontic brackets to 1156*
protein distribution in thin sections of 1108*
scanning electron microscope studies of 242
Enamel, human
effect of aqueous oxalic acid on surfaces of 1099*
three dimensional shape of tufts in 1132*
tooth, effect of natural fluoride concentration of, on fluoride uptake in vitro 302
Enamel, human dental
diffusion of ions into 1130*
electron probe and x-ray diffraction microanalyses of, treated in vitro by fluoride solution 1145*
theoretical aspects of uptake of ^{22}Na by 1130*
Enamel organ, mouse, enzyme histochemistry of the, during maturation and eruption 1103*
Enamel surface
in vivo and in vitro determination of the potentials developed at the, with particular reference to sodium chloride concentration 1087*
reactivity assessment by flow microcalorimetry 1123*
Enameloid, immature, of dogfish teeth, collagen fibers in 1119*
Endochondral and woven bone: See Bone—woven and endochondral
Endocrine and salivary glands in rats, role of insulin in body growth and the growth of 559
Endocrinopathies, cephalometric study of the cranial base in children with, in relation to the craniofacial complex 1160T
Enzymatic digestion, the epithelial-connective tissue junction as seen after 630
Enzyme activity at hydroxyapatite surfaces 777
Enzyme histochemistry of the mouse molar enamel organ during maturation and eruption 1103*
Enzymes
from human dental plaque hydrolyzing α-napthyl phosphate, fractionation of 1243
hydrolytic, in developing dental plaque 1115*
Epinephrine 1:80.000 and 1:250,000 a comparison of 2% lignocaine local anesthetic solutions containing 1120*
Epithelia, keratinizing, in rodents, the effects of friction on 1117*
Epithelial cells: See Cells, oral epithelial
Epithelial fusion and involution during the secondary palate formation in rats, ultrastructural features of the 1135*
Epithelial jaw cysts: a clinico-pathological reappraisal 1098*
Epithelial proliferation in the periodontal ligament 1155*
Epithelial-mesenchymal interaction, electron microscopic and histochemical examination of oral, (programmed cell death) 652
Epithelium
anchoring fibrils in the attachment of, to connective tissue in oral mucous membranes 144
and connective tissue, relationship between, in gingival inflammation 625
attached, of the human gingiva, cytological aspects of the 1142*
follicular, in the ververt monkey, investigation of the morphology of the 1159*
neoplastic, and the underlying mesenchyma, a study of the interface between. Squamous carcinoma of the lip: 702
odontogenic, transformation of, by polyoma virus in vitro 738
palatal, of rat embryos with meclozine-induced cleft palate, ultrastructure of the 1127*
Epithelium, gingival
effect of ischemia on. Experimental ischemia in monkeys: I. 696
histochemical analysis of. Experimental ischemia in monkeys: III. 895
Epithelium, human gingival, and an amnion cell line, a preliminary comparison of mucopolysaccharide elaboration of 1084*
Epithelium, oral
in mice, radiation effects on 641
modifying effects of female sex hormones upon the 1160T
of young and old men, blood groups A and B in 266
study of cornification of, by phase microscopy 274
ultrastructural changes in, following cryogenic surgery 1118*
Epithelium-connective tissue interface
during closure of the secondary palate in rodent embryos 617
quantitative analysis of the, in relation to assessments of the mitotic index 634
Epitheliums in mice, cytogenetic studies of normal and cleft-palate 590
Erupted and unerupted teeth, citrate in the surface enamel of 105
Eruption
and development of teeth in rhesus monkeys, patterns of root and alveolar-bone growth associated with 251
and maturation, enzyme histochemistry of the mouse molar enamel organ during 1103*
central incisor, features associated with failure of, in cases with supernumeraries of the maxilla 1125*
dental, chronology in dogs: deciduous tooth gingival emergence 1177

third-molar, growth, and dental caries in rats, influence of marginal and complete protein deficiency for varying periods during reproduction on 310
Estradiol benzoate, effect of graded doses of, on dental caries and salivary glands in female rats 485††
Ethionine administration, changes in submaxillary gland protein and nucleic acids after 192
Exfoliative cytologic changes in oral leukoplakia 17
Experimental animal: See Animal, experimental
Explants, gingival, cell proliferation in, in vitro 1116*
External environment, the effect of alterations in, on the dentogingival junction 671
Extraoral force, influence of, on possible variation of the maxillary plane 1068*

Face and dental lamina in laboratory animals, histologic correlations between development of the 1138*
Facial bones from suckling dogs, osteometry of: reliability of a radiographic and a direct method 158††
Fat staining in carious dentin 109
Fat-free diet, the effect of a, on the periodontal tissues of the white rat 1100*
Feeding habits, early, a comparison of the effects of, on the caries prevalence of deciduous teeth 1124*
Ferret, the use of the, as an experimental animal for caries research 1129*
Fever, recurrent intraoral herpes simplex virus infections following, clinical and laboratory differentiation of 385
Fiberoptics, cinemicrographs of vital pulp with 329††
Fluorescent material in calcified tissues, investigations into the nature of the 1108*
Fluoridation, table-salt, in Hungary 153††
Fluoride
  and a nonfluoride community, hematologic values of children in a 1145*
  and molybdenum, electron microscopy of enamel formed in the presence of 1303
  blood and urinary levels, in humans associated with ingestion of sodium fluoride-containing vitamin tablets 1211
  calcium, phosphorus, and ash content of enamel of molars in hamsters, effect of desalivation on the 326††
  content and caries prevalence of teeth extracted in high- and low-fluoride towns 1129*
  contents of rat calcified tissues, relation between the 947
  dentifrices, the comparative effect of three, on clinical dental caries in Brisbane school children. Preliminary report 1094*
  in tissue fluids, the composition of the developing deciduous dentition in relation to 761
  in vitro, the inhibition of urease by 1146*
  inhibition of tooth resorbtion by, after implantation 1149T
  natural, effect of, concentration of human tooth enamel on fluoride uptake in vitro 302
  osteogenic response after the local application of, to bone 1157*
  release of, into saliva after topical fluoride application 93
  skeletal retention and anticariogenic efficacy of, when administered in the presence of a prenatal vitamin-mineral supplement 1224
  stannous: See Stannous fluoride
Fluoride and form of rats' molars
  I: effect of fluoride on the size and shape of teeth 1152*
  II: effect of some variables on tooth form 1152*
Fluoride, sodium
  and sodium trimetaphosphate, longitudinal study of cariostatic effects of, when fed separately and together in diets of rats 183
  anticariogenic effect of 965††
  vitamin tablets containing, blood and urinary fluoride levels in humans associated with ingestion of 1211
Fluoride solution(s)
  electron probe and x-ray diffraction microanalyses of human dental enamel treated in vitro by 1145*
  reactions of powdered sound dentin with several 149
Fluoride, topical application(s)
  on human teeth in vitro, uptake and release of fluoride after 1148*
  release of fluoride into saliva after 93
Fluoride uptake
  and release of, after topical fluoride applications on human teeth in vitro 1148*
  by root surfaces of teeth 1148*
  in vitro, effect of natural fluoride concentration of human tooth enamel on 302
Fluoride-ion activity, oral telemetry of 1087*
Fluoride-pumice, acidulated phosphate, prophylactic paste, effectiveness of an: a two-year report 346
5-Fluorouracil, histologic study of the effect of, on chemically induced early dysplasia of the hamster cheek pouch 157††
Food-saliva mixtures, cooked, demineralization of enamel in 282
Forces applied to certain teeth, ability of human subjects to discriminate 236
Forensic and anthropologic study of maxillary canines. Variation in form of human teeth: II. 173
Forensic and anthropologic study of maxillary incisors. Variation in form of human teeth: I. 5
Fracture(s)
  dental root, histomorphologic assessment of the three possible patterns of hard callus in the healing of 1143*
  healing, some biological changes associated with 1151*
Fusiforms
  oral, nutritional requirements of 1104*
  salivary, Eh in relation to 1105*

Gamma-ray spectrometry, high-resolution, and neutron activation, the detection of trace elements in teeth by 1158*
Ganglionectomy, superior cervical, degenerative

changes in submandibular sympathetic nerve trunks after 1126*
Genetic variations in a six-generation family. Dentinogenesis imperfecta: 1196
Genus *Bacteriodes*, bacteriophage virulent for species of the 599††
Germ-free rats, immunofluorescence study of carious lesions in monocontaminated 1144*
Germ-tube formation by *Candida albicans* 230
Gingiva, human
collagen restoration in healing 27
cytological aspects of the attached epithelium of the 1142*
nondiabetic and diabetic, observations of small blood vessels in 967††
normal and inflamed, tissue plasminogen in 603††
Gingiva, longitudinal collagen fibers in 1100*
Gingival biopsy specimens, a histochemical evaluation for small vessel calcification in human nondiabetic and diabetic 968††
Gingival epithelium: See Epithelium, gingival
Gingival explants in vitro, cell proliferation in 1116*
Gingival extension with periosteal fenestration, biometric evaluation of operations of 1069*
Gingival fluid
for quantitative analysis, collection of 159††
high levels of β-glucuronidase in human 1142*
Gingival inflammation, relationship between epithelium and connective tissue in 625
Gingival sulcus 1085*
Gingival vascular response to anticipated and actual punctate stimulation 419
Gingivectomy
cytologic evaluation of physiotherapy after 600††
technic, biometric evaluation of 1069*
Gingivitis
acute necrotizing ulcerative, apparent digital vasomotor hypotonicity in the remission stage of 431
correlation between, and orogranulocytic migratory rate 716
Gland, retrolingual and submaxillary, calcium concentration of the, after autonomic denervation in rats 1075*
Gland, submaxillary
and retrolingual, calcium concentration of the, after autonomic denervation in rats 1075*
protein and nucleic acids changes in, after ethionine administration 192
Glands, parotid
rat, the function of intercalated ducts in 1157*
and sublingual, localization of tetracycline in rat 932
Glands, submandibular, in female rats, effect of progesterone on growth and development of 943
Glands, submaxillary
and thyroid, 99Tc uptake by, in A_2G mice 1076*
in C_3H mice, effects of parasympathetic denervation, castration, and testosterone propionate on the 1077*
in hamsters, role of autonomic innervation on the 131_I uptake by 1077*
in rats, effect of sympathetic and parasympathetic denervation on the structure of 1076*
Glands, thyroid and submaxillary, 99Tc uptake by, in A_2G mice 1076*
β-Glucuronidase, high levels of, in human gingival fluid 1142*
Glycolysis and respiration in bovine dental pulp 439
Gold alloys
dental casting, improved tensile specimen for 278
dental gold casting alloy and dental wrought, chemical composition of 1284
Gold-porcelain bonding, microprobe analyses of 1206
Gold, sponge, possibilities of, as restorative dental material 1071*
Gordon Research Conference 339
Grafts, tooth, conservation of, in hyperbaric oxygen 487††
Gram-staining mechanism of superficial oral epithelial cells 392
Growth analysis, serial: a computer technic 1083*
Growth, third-molar eruption, and dental caries in rats, influence of marginal and complete protein deficiency for varying periods during reproduction 310
Guinea pig
evidence of thyrocalcitonin in, and its effects on maternal-fetal calcium relationships 307
growth rates in mandibles and maxillas of the, microradiographic-topographic study of 298
Guinea pig skin collagen synthesis, effect of ascorbic acid on:
I. Total collagen 863
II. Neutral and acid soluble collagens, mucopolysaccharides, and amino acid composition 83
Gypsum materials, setting reactions of, investigated by X-ray diffraction 43

Halidor, effects of, on soft oral structures 484††
Hamster
basal epithelial cells in vivo, effects of low level x radiation on the mitotic index of 1049
developing maxillary incisor, innervation of the 361
pouch carcinogenesis, effect of alcohol and cigarette smoke as promoting agents in 1200
teeth, periodontally diseased, some effects of orthodontic tooth movement in 1160T
Hamster cheek pouch
and palate, cell-cycle characteristics in the epithelium of 1113*
histologic study of the effect of 5-fluorouracil on chemically induced early dysplasia of the 157††

Hamsters
effect of desalivation on the ash, calcium, phosphorus, and fluoride content of enamel of molars in 326††
fed different carbohydrates, plaque formation and implantation of *Odontomyces viscosus* in 824
role of autonomic innervation on the ^{131}I uptake by submaxillary glands in 1077*
Handpiece: See Air-turbine handpiece
Head growth, total, a measurement of the, during administration of human growth hormone to hypophysial dwarfs 1160T
Hearing loss at level of 4 and 8 kc in young dentists 1072*
Heating, local, tooth-eruption ages in suckling dogs as affected by 427
Hematologic values of children in a non-fluoride and a fluoride community 1145*
Hepatomegaly in mice undergoing allograft rejection 1088*
Herpes simplex virus infections following fever, clinical and laboratory differentiation of recurrent intraoral 385
Herpetic infection, recurrent intraoral 1126*
Histochemical studies: See entries for type of material or tissue under consideration
Histological studies: See entries for type of material or tissue under consideration
Homologous teeth, time interval between the eruption of the 291
Hormonal effects on oral epithelial cells 1113*
Hormone(s)
adrenocortical, role of, in growth and development of salivary glands in immature female rats 602††
female sex, the modifying effects of, upon the oral epithelium 1160T
human growth, a measurement of the total head growth during administration of, to hypophysial dwarfs 1160T
Human subjects, ability of, to discriminate forces applied to certain teeth 236
Hungary, table-salt fluoridation in 153††
Hydrocortisone
an autoradiographic study of ^{3}H-proline uptake in the palate of normal mice and in the palate of mice treated with 1039
ascorbic acid, and oxygen, influence of, on mouse mandible cultured in vitro on a chemically defined medium 1116*
Hydrostatic pressure, transduction of, to electric potential in human dentin 226
Hydroxyapatite
model, a critical examination of the. Quantitation of enamel demineralization mechanisms: III. 396
surfaces, enzyme activity at 777
Hypersensitivity, delayed, to *Candida albicans* in patients with denture stomatitis, the incidence of 1134*
Hypoglycemic drugs, oral and insulin: See Insulin
Hypoplasia, linear, of human deciduous incisors, factors associated with 1275
Hypotheses testing sample size and P values: what is it all about? 1160T
Hypoxia, severe, in the rat, vascular pulpal lesions induced through 1141*
^{131}I uptake by submaxillary glands in hamsters, role of autonomic innervation on the 1077*
Immunity, circulating and cell-mediated, induced by the gingival and systemic administration of oral bacteria, a comparative study of 1098*
Immunofluorescence study of carious lesions in monocontaminated germ-free rats 1144*
Immunological and kinetic studies of levan sucrase formed by *Odontomyces viscosus* 1106*
Impact and tensile forces, the effect of, on crown posts 1122*
Implantation, inhibition of tooth resorbtion by fluoride after 1149T
Implants, Co-Cr-Mo, Cr analysis of rat muscle adjacent to 1126*
Implants, subcutaneous and intraosseous, of polyethylene tube in rats 1082*
Impression materials, elastomeric
composition, chemistry, and properties of some 1112*
permanent set of, in relation to time 1092*
Incisor
abnormalities in aged mice 1113*
central, eruption, features associated with failure of, in cases with supernumeraries of the maxilla 1125*
dentin and bone, rat, electron microscopy of the calciotraumatic response in, to parenteral and oral administration of tetracycline 521
developing hamster maxillary, innervation of the 361
mandibular, consequences of, extraction in the young mouse: I. Histologic aspects 583
rabbit and rat, in vitro, comparison of the exhaustion of the oxidative processes of 71
teeth, lower, of mongoloid and non-mongoloid individuals with severe periodontal disease, root-crown ratios of 1153*
Incisors
and molars, rodent, comparison of cell numbers in pulps of 597††
human deciduous, factors associated with linear hypoplasia of 1275
in rats, effect of combinations of temperature and light upon skeletal development and growth rate of 461
maxillary, forensic and anthropologic study of. Variation in form of human teeth: I. 5
Index, mandibular
growth of the mandible evaluated by the 1074*
in *Anthropoidea* 1074*
Indexes and malocclusion, a new approach to 1087*
Indians and Malays, 296, in West Malaysia, the effects of betel-nut chewing on the buccal mucosa of 1112*
Indians, Navajo, of Monument Valley, Utah, incidence of dental disease among the 328††
Inferior dental nerve in rats, sectioning of the 969††

Influence of the operator's experience during packing 1073*
Infra-red spectra of chlorhydroxyapatites 1120*
Inhibitory effect of disclosing solutions on plaque growth and culture 1100*
Inlay, gold, and crown restorations, base materials for 1091*
Innervation
autonomic, role of, on the ^{131}I uptake by submaxillary glands in hamsters 1077*
of the developing hamster maxillary incisor 361
of the temporalis muscle in the cat, physiologic analysis of 327††
Inorganic constituents in dental plaque, a study of 799
Insulin
and oral hypoglycemic drugs, effect of, on dental caries in pancreatectomized rats 1079*
role of, in body growth and the growth of salivary and endocrine glands in rats 559

of rabbits, experimentally induced osteomyelitis in the 1160T
rat, postnatal development of the 1258
subcondylar fracture of the, after ablation of the lateral pterygoid in rats, healing of 1097*
wounds: See Wounds of the mandible
Mandibles
and maxillas of the guinea pig, microradiographic-topographic study of growth rates in 298
of the dog, bone tissue reconstruction in normal and partially edentulous 1137*
Mandibular growth in the rat, tetracycline and ^{45}Ca in quantitative studies of 1136*
Mandibular index
growth of the mandible evaluated by the 1074*
in *Anthropoidea* 1074*
Mandibular posture in treated temporomandibular joint patients, perception of 1069*
Mandibular symphysis, developmental study of the 1136*
Masseter muscle: See Muscle, masseter
Mast cell population in Mikulicz's recurrent oral aphthae, quantitative changes in the 901
Mast cells
effect of extracts of dental plaque on 1101*
in healing of irradiated wounds 1081*
Masticatory function, impaired, a cephalometric study of craniofacial development in rabbits with 1268
Masticatory muscles: See Muscles—masticatory
Materials
restorative dental, possibilities of sponge gold as 1071*
two composite, effect of crosshead speed on the strength of 1071*
Maternal-fetal calcium relationships, evidence of thyrocalcitonin in guinea pig and its effects on 307
Matrix, sectional, for compound amalgam restorations 1072*
Maturation and eruption, enzyme histochemistry of the mouse molar enamel organ during 1103*
Maxillary plane, influence of extraoral force on possible variation of the 1068*
Maxillas and mandibles: See Mandibles and maxillas
Meclozine-induced cleft palate, ultrastructure of the palatal epithelium of rat embryos with 1127*
Men, young and old, blood groups A and B in oral epithelium of 266
Menstrual cycle, a relationship between human oral bacteria and the 1130*
Mesenchyma, underlying, a study of the interface between neoplastic epithelium and the. Squamous carcinoma of the lip: 702
Metabolism in rats, studies comparing the, of radiophosphorus provided as NaH_2PO_4 and other inorganic phosphates 217
Metal surface changes during porcelain firing 321
Metronidazole, in vitro sensitivity of oral spirochetes to 1101*
Mice
absence of elastic fibers during movement of the palatal shelves in, further evidence for the 155††
aged, incisor abnormalities in 1113*
cleft-palate, labeling index and cellular density in palatine shelves of 263
hepatomegaly in, undergoing allograft rejection 1088*
pathogenicity of *Rothia dentocariosa* inoculated into 957
radiation effects on oral epithelium in 641
Mice, A_2G, 99Tc uptake by submaxillary and thyroid glands in 1076*
Mice, C_3H, effects of parasympathetic denervation, castration, and testosterone propionate on the submaxillary glands in 1077*
Mice, normal
and cleft-palate epitheliums in, cytogenetic studies of 590
and treated with hydrocortisone, an autoradiographic study of ^3H-proline uptake in the palate of 1039
Microanalysis, electron probe, of noncarious enamel and dentin and calcified tissues in mottled teeth 131
Microbial population of saliva, cocoa as a limiting factor on the 1309††
Microcalorimetry, flow, enamel surface reactivity assessment by 1123*
Microflora, substances in saliva used by the 1106*
Microhardness of sound and gangrenous root dentin 1141*
Micromethod for the determination of amino acids in human dental plaque 1315††
Microprobe analyses of gold-porcelain bonding 1206
Microprobe, electron: See Electron microprobe
Microsampling of enamel from the histological zones of carious lesions 1128*
Microscope, electron: See Electron microscope; See also listings for type of tissue or material under consideration
Microscopic studies: See entries for material or tissue under consideration
Microsomes, polyribosomes, and protein synthesis in oral tissues 857
Mikulicz's recurrent oral aphthae
effect of sera and lymphocytes upon oral epithelial cells in tissue culture 1134*
quantitative changes in the mast cell population in 901
suppression of in vitro lymphocyte cytotoxicity in, with antihuman lymphocyte serum 1114*
Mineralization
considered as a simple physicochemical flux 1128*
of keratins, in vitro 1153*
prekeratin 1150*
Mitotic index
a quantitative analysis of the epithelium-connective tissue interface in relation to

assessments of the 634
of hamster basal epithelial cells in vivo, effects of low level x radiation on the 1049
Modeling wax: See Wax, modeling
Molar, third, development in Australian aborigines and whites 1083*
Molars and incisors, rodent, comparison of cell numbers in pulps of 597††
Molars, deciduous, pulpal and dentinal response to dental caries in 1127*
Molars, rats', fluoride and form of
I: effect of fluoride on the size and shape of teeth 1152*
II: effect of some variables on tooth form 1152*
Molybdenum
and fluoride, electron microscopy of enamel formed in the presence of 1303
some effects of, on connective tissue 1290
Mongolism: See Trisomy-21
Mongoloid and non-mongoloid individuals with severe periodontal disease, root-crown ratios of lower incisor teeth of 1153*
Monkey, ververt, investigation of the morphology of the follicular epithelium in the 1159*
Monkeys
captive, bone defects in alveolar apophyses of 1082*
topical antibiotic treatment of infected dental pulps of 351
Monkeys, experimental ischemia in
I. Effect of ischemia on gingival epithelium 696
II. Vascular response 888
III. Histochemical analysis of gingival epithelium 895
Monkeys, *Macaca irus*
amino acid composition of dental plaque from 1115*
induction of rampant dental caries in 1097*
Monkeys, rhesus
cellular dynamics in root formation of teeth in 114
condylar growth in 1171
patterns of root and alveolar-bone growth associated with development and eruption of teeth in 251
Monument Valley, Utah: See Utah, Monument Valley
Mouse
molar enamel organ, enzyme histochemistry of the, during maturation and eruption 1103*
submandibular salivary glands, comparison between the concentration of iodide and pertechnetate in 1131*
thoracic duct lymphocytes, the immunological competence of 1094*
tooth development, a study of, on the chick chorioallantois. Inductive changes in early tooth development: I. 719
young, the consequences of mandibular incisor extraction in the: I. Histologic aspects 583
Mouth, an evaluation of the use of the anterior segment of the, as an indicator of the gingival condition of the whole mouth in adults 1124*
Movement, vertical, of the teeth and cast during packing 1073*
Mucopolysaccharide(s)
and calcium: See Calcium and mucopolysaccharide content
elaboration of human gingival epithelium and an amnion cell line, a preliminary comparison of 1084*
neutral and acid soluble collagens, and amino acid composition. Effect of ascorbic acid on guinea pig skin collagen synthesis: II. 83
Mucosa, buccal: See Buccal mucosa
Mucosa, oral: See Oral mucosa
Mucous membrane pemphigoid immunofluorescent studies 1248
Mucous membranes, oral: See Oral mucous membranes
Muscle
lateral pterygoid, muscle spindles in the 1084*
spindles, the role of, in the response of the masseter muscle to tooth contact 1131*
temporalis, in the cat, electrophysiologic analysis of innervation of 327††
Muscle, masseter
changes in the activity of the, following tooth contact 1131*
role of muscle spindles in the response of the, to tooth contact 1131*
Muscles
masticatory, some new data concerning the texture of the 1140*
of mastication, histochemical characterization of the 97

^{24}Na, uptake of, by human dental enamel, theoretical aspects of 1130*
Na2FPO3, the effect of, on salivary bacteria 1085*
NaH_2PO_4: See Radiophosphorus
α-Naphthyl phosphate, hydrolyzing, fractionation of enzymes from human dental plaque 1243
Nasal airflow as an index of success of prosthetic management of cleft palate 368
Navajo Indians: See Indians, Navajo
Neuroectoderm, pharyngeal membrane, Rathke's pouch, and notochord in the human, embryologic relationships between 1160T
Neutron activation and high-resolution gamma-ray spectrometry, the detection of trace elements in teeth by 1158*
New Zealand adolescents and young adults, occupational status, sex, and dental fitness in 1154*
Newt amelogenesis, 3H amino acid uptake in 1117*
NIH policy on page changes 339
Noise
dental turbine, causes of 1073*
of the "noiseless" dental turbines 1073*
Nonfluoride and a fluoride community, hematologic values of children in a 1145*
Norepinephrine injected locally, the effect on tooth mobility of 1132*
North Dakota field test of cariostatic effect of 1% sodium dihydrogen phosphate and

disodium hydrogen phosphate added to presweetened breakfast cereals 1308††
Notochord, Rathke's pouch, pharyngeal membrane and neuroectoderm in the human, embryologic relationships between 1160T
Nucleic acids and submaxillary gland protein, changes in, after ethionine administration 192
Numerical experiments with a linear force-displacement tooth model 32
Nutritional requirements of oral fusiforms 1104*

Occlusal contact and attrition, role of, in the physiology of the rat incisor: IV. Prevention of attrition in the articulating incisor 120
Occlusal influence on temporomandibular joint morphology in natives of Southern Argentina 1075*
Odontomyces viscosus
kinetic and immunological studies of levan sucrase formed by 1106*
levan formation by 938
plaque formation and implantation of, in hamsters fed different carbohydrates 824
Odonto-pediatric treatment, unconscious aspects of, detected through combined dental-psychological treatment 1068*
Oral Biology, Fourth International Conference on
committees, participants 615
greetings 613
Oral disease, research in: portents for the future 1059
Oral epithelial-mesenchymal interaction: See Epithelial-mesenchymal interaction
Oral epithelium: See Epithelium, oral
Oral flora, antimicrobial control of bacterial plaque and calculus and the effects of these agents on 832
Oral health
and disease prevention, research on, presidential inaugural address: comprehensiveness, too, in 985
the function and reliability of the orogranulocytic migratory rate as a measure of 709
Oral hygiene
and periodontal condition in soldiers, preliminary observation of 1070*
instruction, an assessment of a child-centered teaching program in 1133*
Oral mucosa, studies on the origin of mononuclear cells in delayed hypersensitivity reaction of 689
Oral mucosal lesions, computer-aided cluster and discriminant analyses of the histologic features of some 1096*
Oral mucous membranes
absorption through 680
anchoring fibrils in the attachment of epithelium to connective tissue in 144
Oral organisms from different sugars, the production of extracellular polysaccharides by 1107*
Organic matrix and bone crystals, the ultrastructural interface of, in woven and lamellar endochondral bone 781
Orogranulocytic migratory rate
as a measure of oral health, the function and reliability of the 709
correlation between gingivitis and 716
Orthodontic brackets, stainless steel, investigations on the adhesion of, to dental enamel 1156*
Osteofluorosis, some biophysical aspects of 1090*
Osteogenesis in wounds of the mandible, inhibition of, by vital periodontal ligament 1102*
Osteogenic tissue, thymidine-^{3}H study of developing tooth germs and 753
Osteometry of facial bones from suckling dogs: reliability of a radiographic and a direct method 158††
Osteomyelitis in the mandible of rabbits, experimentally induced 1160T
Oxidative processes of rat and rabbit incisor pulp in vitro, comparison of the exhaustion of the 71
Oxygen
and pH tension, the effect of, on the nature and amount of organic acid produced by certain oral bacteria 1105*
ascorbic acid, and hydrocortisone on mouse mandible cultured in vitro on a chemically defined medium, influence of 1116*
consumption in bovine dental pulp, the effect of cyanide on 920
hyperbaric, conservation of tooth grafts in 487††

Palatal height, maximum, in patients with Turner's syndrome 473
Palatal processes in vitro and in vivo, study of the fusion of 1135*
Palatal shelves in mice, further evidence for the absence of elastic fibers during movement of the 155††
Palate
and cheek pouch, hamster, cell-cycle characteristics in the epithelium of 1113*
embryonic rat, study of closure of the, in vitro with the effects of certain chemicals 568
normal and abnormal growth and differentiation of the. Experimental teratology: 1160T
soft, function, the "stretch factor" in 972††
Palate, cleft: See Cleft palate
Palate, secondary
formation in rats, ultrastructural features of the epithelial fusion and involution during the 1135*
in rodent embryos, the epithelium-connective tissue interface during closure of the 617
Palatine shelves of cleft-palate mice, labeling index and cellular density in 263
Paraffin chewing as a saliva-stimulating agent 325††
Paraffin wax: See Wax—paraffin
Parathyroidectomized rats, histochemical study of dentin in 1251
Parathyroidectomy, in female rat salivary

glands, effect of castration on response to 1078*
Parotid glands: See Glands, parotid
Pemphigoid, mucous membrane, immunofluorescent studies 1248
Peptide hydrolases and dehydrogenases in bovine dental pulp, age dependent changes of certain 951
Periapical reactions to trioxymethylene paste root canal treatment 1080*
Periodontal condition
and blood citrate level in pregnant women 140
and oral hygiene in soldiers, preliminary observation of 1070*
Periodontal disease
and blood citrate levels in patients with trisomy 21 1231
biological changes at the tooth-saliva interface in 846
in sheep, serum-citrate levels and 1153*
root-crown ratios of lower incisor teeth of mongoloid and non-mongoloid individuals with severe 1153*
Periodontal ligament
epithelial proliferation in the 1155*
vital, inhibition of osteogenesis in wounds of the mandible by 1102*
Periodontal pockets of one and two bony walls, autogenous bone transplants in the treatment of: I. coronal migration of the bottom of the pocket 1070*
Periodontal syndrome in rice rats, influence of alternating feedings of diets with high and low potentials to cause the 486††
Periodontal tissues
of man, the origin of collagenase in 646
of the white rat, the effect of a fat-free diet on the 1100*
Periodontal surgical dressings, the effect of different types of, on the bacterial flora of the healing wound 1104*
Periodontally diseased hamster teeth, some effects of orthodontic tooth movement in 1160T
Periodontium
bone regeneration in, after fixed splinting 1070*
of citrated rats, effect of coenzyme Q on blood-citrate and calcium levels and on the 1264
Periosteal fenestration, biometric evaluation of operations of gingival extension with 1069*
Pertechnetate and iodide in mouse submandibular salivary glands, comparison between the concentration of 1131*
pH and oxygen tension, the effect of, on the nature and amount of organic acid produced by certain oral bacteria 1105*
Phagocytosis of cariogenic streptococci, a study of some factors influencing, by caries-free and caries-active individuals 842
Pharyngeal membrane, Rathke's pouch, notochord and neuroectoderm in the human, embryologic relationships between 1160T
Phase microscopy: See Microscopy, phase
Pheochromocytoma, bilateral, a case of medullary carcinoma of the thyroid in a patient with 1149T
Phosphate, acidulated, fluoride-pumice prophylactic paste, effectiveness of an: a two-year report 346
Phosphorus
calcium, ash, and fluoride content of enamel of molars in hamsters, effect of desalivation on the 326††
in biological samples, the determination of, a comparative study 1157*
Phylogeny and comparative anatomy of oral ectodermal-ectomesenchymal inductive interactions 732
Physical properties of four thermosetting dental restorative resins 526
Physiotherapy after gingivectomy, cytologic evaluation of 600††
Pig(s)
anesthesia of the, for experimental dental work 1103*
features of the dentition of the, for experimental work 1103*
growth of the zygomaticomaxillary suture in, after sectioning the zygomatic arch 573
Pilocarpine effect in the metabolism of rat salivary glands 1077*
Pins, early strength of dental amalgam as influenced by 489††
Plaque
and caries system, an experimental 1116*
bacterial, and calculus, antimicrobial control of, and the effects of these agents on oral flora 832
growth and culture, the inhibitory effect of disclosing solutions on 1100*
phosphate levels, changes in, during ingestion of sugar and sugar with added phosphate 1115*
Plaque, dental
biochemical studies on the formation and composition of, in relation to dental caries: extracellular polysaccharides 811
developing, hydrolytic enzymes in 1115*
effect of extracts of, on mast cells 1101*
from *Macaca irus*, amino acid composition of 1115*
inorganic constituents in, a study of 799
metabolism of levan by 1114*
method for separating components 1144*
Plaque F- and plaque pH 1114*
Plaque formation
and composition with reference to caries 1155*
and implantation of *Odontomyces viscosus* in hamsters fed different carbohydrates 824
Plaque(s), human dental
hydrolyzing α-naphthyl phosphate, fractionation of enzymes from 1243
micromethod for the determination of amino acids in 1315††
unhomogenized, the reproducibility of acid production by 1106*
Plasmatic sialic acid: See Acid—plasmatic sialic
Plasminogen, tissue, in normal and inflamed human gingiva 603††

Plaster, effect of soaking on the physical properties of 423
Polyethylene tube, subcutaneous and intraosseous implants of, in rats 1082*
Polymethyl methacrylate
elastomeric mold liners in the production of porosity-free 61
the transverse strengths of repairs in 1092*
Polyoma virus in vitro, transformation of odontogenic epithelium by 738
Polyribosomes, microsomes, and protein synthesis in oral tissues 857
Polysaccharides, extracellular
Biochemical studies on the formation and composition of dental plaque in relation to dental caries: 811
the production of, by oral organisms from different sugars 1107*
Porcelain firing, metal surface changes during 321
Porcelain-gold bonding, microprobe analyses of 1206
Porcelains, dental
properties of, in relation to their compositions 1111*
x-ray diffraction analysis of 543
Porphyrin-induced photosensitivity in rats 1093*
Pregnancy
effect of, on rat salivary glands 1078*
middle third of, growth of the human fetal jaws in the 1102*
Pregnant women, periodontal condition and blood citrate level in 140
Prekeratin mineralization 1150*
Premolar, second, morphologic trait similarities in twins 74
Prilocaine 4%, a clinical comparison between, and lignocaine 2% 1:80,000 adrenaline 1093*
Primates
as experimental animals. Some new approaches to cleft palate research: 1160T
three-view x-ray cephalometry of 1312††
Progesterone, effect of, on growth and development of submandibular glands in female rats 943
Programmed cell death: See Cell death, programmed
^{3}H-proline, incorporation of, into normal and lathyritic teeth of the rat, autoradiographic study on the 1148*
^{3}H-Proline uptake
by the cells of developing teeth 257
in the palate of normal mice and in the palate of mice treated with hydrocortisone, an autoradiographic study of 1039
Prophylactic paste, acidulated phosphate fluoride-pumice, effectiveness of an: a two-year report 346
Prosthetic management of cleft palate, nasal airflow as an index of success of 368
Prosthetic status and tooth loss in a British adult population 1125*
Protein
content of the brain and liver, changes produced by age in the 1160T
deficiency, marginal and complete for varying periods during reproduction, influence of, on growth, third molar eruption and dental caries in rats 310
distribution in thin sections of dental enamel 1108*
fractions present in fetal bovine enamel, characterization of 1109*
intermolecular interfaces in connective tissue, some quantum aspects of the 661
lipophilic and lipophobic, components of bovine fetal enamel matrix, the amino acid composition and electrophoretic patterns of the 1107*
submaxillary gland, and nucleic acids, changes in, after ethionine administration 192
Protein synthesis
during amelogenesis, autoradiographic electron microscopy of 1139*
microsomes, and polyribosomes in oral tissues 857
Proteins
human saliva, and their role in the formation of the acquired enamel pellicle, some observations on 806
salivary, the interaction of, with tooth surface 818
Psychologic stress in a video-simulated dental restoration 444
Pterygoid, lateral, in rats, healing of subcondylar fracture of the mandible after ablation of the 1097*
239Pu and 226Ra, influence of, on the dental root canal of the dog 924
Pulp
rabbit and rat incisor, in vitro, comparison of the exhaustion of the oxidative processes of 71
vital, cinemicrographs of, with fiberoptics 329††
Pulp, bovine dental
age dependent changes of certain peptide hydrolases and dehydrogenases in 951
effect of cyanide on oxygen consumption in 920
respiration and glycolysis in 439
Pulp, dental
human, covered with calxyl with or without zinc oxide-eugenol, reaction of 1149T
in dogs, lymphatic vessels of the 959
transplant of, in the rabbit, heterotopic dentin and bone formation produced by 1142*
Pulpal and dentinal response to dental caries in deciduous molars 1127*
Pulpal lesions, vascular, induced through severe hypoxia in the rat 1141*
Pulpectomy, effect of, on dentin hardness 452
Pulps
infected dental, of monkeys, topical antibiotic treatment of 351
of rodent incisors and molars, comparison of cell numbers in 597††
rat molar, effect of tetracycline-L-metilenlysine and calcium hydroxide on healthy, experimentally exposed 1080*
Pumice: See Fluoride—pumice
Punctate stimulation, anticipated and actual, gingival vascular response to 419

226Ra and 239Pu, influence of, on the dental root canal of the dog 924
Rabbit(s)
and rat incisor pulp in vitro, comparison of the exhaustion of the oxidative processes of 71
experimentally induced osteomyelitis in the mandible of 1160T
transplant of dental pulp in the, heterotopic dentin and bone formation produced by 1142*
with impaired masticatory function, a cephalometric study of craniofacial development in 1268
Radiation effects on oral epithelium in mice 641
Radiographic and microradiographic studies: See also listings for material or tissue involved
Radiographic cephalometric analysis, accuracy of angular measurements obtained from 595††
Radioisotopic studies of the glandular contribution of selected B vitamins in saliva 579
Radiophosphorus provided as NaH_2PO_4 and other inorganic phosphates, studies comparing the metabolism in rats of 217
Rat
and human cariogenic streptococci in dentin, cross-reactivity of 488††
and rabbit incisor pulp in vitro, comparison of the exhaustion of the oxidative processes of 71
bone and incisor dentin, electron microscopy of the calciotraumatic response in, to parenteral and oral administration of tetracycline 521
calcified tissues, relation between the fluoride contents of 947
embryos with meclozine-induced cleft palate, ultrastructure of the palatal epithelium of 1127*
incorporation of ^{3}H-proline into normal and lathyritic teeth of the, autoradiographic study on the 1148*
integrity of salivary glands and the incidence of dental caries in the, influence of corticosterone on the 467
mandible, postnatal development of the 1258
mandibular growth in the, tetracycline and ^{45}Ca in quantitative studies of 1136*
molar pulps, healthy, experimentally exposed, effect of tetracycline-L-metilenlysine and calcium hydroxide on 1080*
muscle adjacent to Co-Cr-Mo implants, Cr analysis of 1126*
palate, study of closure of the embryonic, in vitro with the effects of certain chemicals 568
parotid and sublingual glands, localization of tetracycline in 932
parotid glands, the function of intercalated ducts in 1157*
submandibular gland, incidence of induced tumors in the, with different doses of 7, 12-dimethylbenz-(α)-anthracene 1316††
vascular pulpal lesions induced through severe hypoxia in the 1141*
Rat incisor(s)
dentin and bone, electron microscopy of the calciotraumatic response in, to parenteral and oral administration of tetracycline 521
effect of dietary consistency upon 156††
physiology of the, role of attrition and occlusal contact in the: IV. Prevention of attrition in the articulating incisor 120
upper, progressive atrophy and expulsion of, after prolonged vitamin-A deficiency 330††
Rat salivary gland calcium and mucopolysaccharide content
age and sex role in 1078*
atropine and isoproterenol action on 1078*
Rat salivary glands
effect of pregnancy on 1078*
female, effect of castration on response to parathyroidectomy in 1078*
integrity of and dental caries incidence in the, influence of corticosterone on the 467
pilocarpine effect in the metabolism of 1077*
Rat, white, the effect of a fat-free diet on the periodontal tissues of the 1100*
Rathke's pouch, notochord, pharyngeal membrane and neuroectoderm in the human, embryologic relationships between 1160T
Rats
albino, tooth germs of, cultivated in tissue culture 1138*
calcium concentration of the submaxillary and retrolingual gland after autonomic denervation in 1075*
citrated, effect of coenzyme Q on blood-citrate and calcium levels and on the periodontium of 1264
diets of, longitudinal study of cariostatic effects of sodium trimetaphosphate and sodium fluoride when fed separately and together in 183
effects of sialadenectomy on plasmatic sialic acid concentration in 1076*
experimental alveolodental ankylosis in 1081*
germ-free, cariogenic potential of streptococcus No. 167 in 1313††
growth, third-molar eruption, and dental caries in, influence of marginal and complete protein deficiency for varying periods during reproduction 310
healing of subcondylar fracture of the mandible after ablation of the lateral pterygoid in 1097*
lathyritic, dental calculus in 966††
male, autoradiographic demonstration of DNA synthesis in selected epithelial tissues in 1219
monocontaminated germ-free, immunofluorescence study of carious lesions in 1144*
pancreatectomized, effect of insulin and oral hypoglycemic drugs on dental caries in 1079*
parathyroidectomized, histochemical study of dentin in 1251

porphyrin-induced photosensitivity in 1093*
rice, influence of alternating feedings of diets with high and low potentials to cause the periodontal syndrome in 486††
salivary and endocrine glands in, role of insulin in body growth and the growth of 559
salivary glands of, acid glycosaminoglycans and sialic acid content in 555
secondary palate formation in, ultrastructural features of the epithelial fusion and involution during the 1135*
sectioning of the inferior dental nerve in 969††
skeletal development and the growth rate of incisors in, effect of combinations of temperature and light upon 461
splenectomized, antibody production in, following intragingival immunization 1086*
studies comparing the metabolism in, of radiophosphorus provided as NaH2PO4 and other inorganic phosphates 217
subcutaneous and intraosseous implants of polyethylene tube in 1082*
submaxillary glands in, effect of sympathetic and parasympathetic denervation on the structure of 1076*
young, the effect of analogues of tetracycline on the molar teeth of 1090*
Rats, female
effect of graded doses of estradiol benzoate on dental caries and salivary glands in 485††
effect of progesterone on growth and development of submandibular glands in 943
effect of some contraceptive steroids on growth and development of salivary glands and incidence of dental caries in 477
role of adrenocortical hormones in growth and development of salivary glands in immature 602††
Rats' molars, fluoride and form of
I: effect of fluoride on the size and shape of teeth 1152*
II: effect of some variables on tooth form 1152*
Remineralized carious enamel, histologic and ultrastructural features of 766
Reptiles, various, the young transitory enamel in 1138*
Research: See listings for type of research, i.e. Cleft palate; Oral disease; Oral health, etc.
Resins, physical properties of four thermosetting dental restorative resins 526
Respiration and glycolysis in bovine dental pulp 439
Restoration, video-simulated dental, psychologic stress in a 444
Restorations, temporary: See Temporary restorations
Restorative materials: See Materials and related subjects
Retardation of enamel dissolution rates by adsorbed long-chain ammonium chlorides 509
Retrolingual gland: See Gland, retrolingual
Rhesus monkeys: See Monkeys, rheusus
Rice rats: See Rats, rice
Rodent embryos, epithelium-connective tissue interface during closure of the secondary palate in 617
Rodents, the effects of friction on keratinizing epithelia in 1117*
Root
and alveolar-bone growth, patterns of, associated with development and eruption of teeth in rhesus monkeys 251
dentin, microhardness of sound and gangrenous 1141*
formation of teeth in rhesus monkeys, cellular dynamics in 114
fractures, dental, histomorphologic assessment of the three possible patterns of hard callus in the healing of 1143*
surface of a tooth, copper localization on the 970††
surfaces of teeth, fluoride uptake by 1148*
Root canal
dental, of the dog, influence of 226Ra and 239Pu on the 924
fillings with plastic cements, tissue reaction to 1080*
sealing materials, some physical properties of 1087*
therapy, the success rate in conventional 1121*
topography, deciduous tooth 1074*
treatment, trioxymethylene paste, periapical reactions to 1080*
Root canals, infected, the bacterial flora of, and their sensitivity to certain antibiotics 1157*
Root-crown ratios of lower incisor teeth of mongoloid and non-mongoloid individuals with severe periodontal disease 1153*
Rothia dentocariosa inoculated into mice, the pathogenicity of 957

Saliva
antilactobacillus agent in, factors which influence the assay of the 22
cocoa as a limiting factor on the microbial population of 1309††
lactic acid determination in aqueous media: application to 1143*
radioisotopic studies of the glandular contribution of selected B vitamins in 579
release of fluoride into, after topical fluoride application 93
substances in, used by the microflora 1106*
whole and parotid, composition in trisomy-21 (mongolism) and other congenitally mentally defective persons 1151*
Saliva, human
parotid, variations in, over 24-hour periods 1132*
proteins, and their role in the formation of the acquired enamel pellicle, some observations on 806
whole, chromatographic separation of ether-extractable components of aerobically incubated 601††
Saliva-food, cooked mixtures, demineralization of enamel in 282
Saliva-stimulating agent, paraffin chewing as a 325††

Salivary and endocrine glands in rats, role of insulin in body growth and the growth of 559
Salivary bacteria: See Bacteria, salivary
Salivary excretion of lithium
I. Human parotid and submaxillary secretions 546
II. Functional analysis 550
Salivary gland calcium and mucopolysaccharide content, rat
age and sex role in 1078*
atropine and isoproterenol action on 1078*
Salivary glands
influence of corticosterone on the integrity of, and the incidence of dental caries in the rat 467
mixed tumors of the, histochemic and histoenzymologic characteristics of the 1143*
mouse submandibular, comparison between the concentration of iodide and pertechnetate in 1131*
Salivary glands, rat(s)
acid glycosaminoglycans and sialic acid content in 555, 1077*
effect of pregnancy on 1078*
pilocarpine effect in the metabolism of 1077*
Salivary glands in female rats
effect of castration on response to parathyroidectomy in 1078*
effect of graded doses of estradiol benzoate on dental caries and 485††
effect of some contraceptive steroids on growth and development of, and incidence of dental caries in 477
immature, role of adrenocortical hormones in growth and development of 602††
Salivary proteins, the interaction of, with tooth surface 818
Salivary stone formation and apatitic nuclei in hard tissue analyzed by electron microscopy and diffraction 1140*
Salmonella typhimurium, the mechanisms of resistance and susceptibility to antibody and complement of strains of 1088*
Salt, table-, fluoridation in Hungary 153††
Sample size and P values, hypotheses testing: what is it all about? 1160T
Second premolar morphologic trait similarities in twins 74
Secondary palate: See Palate, secondary
Secretions, crustacean bioadhesive 1124*
Secretory activity of submaxillary cells in culture 1116*
Sedation of patients with intravenous diazepam before minor oral surgical procedures under local anesthesia 1121*
Selenium areas, high- and low-, caries prevalence in 1152*
Seminars, compulsory, survey of 1074*
Sera and lymphocytes, effect of, upon oral epithelial cells in tissue culture, Mikulicz's recurrent oral aphthae: 1134*
Serum-citrate levels and periodontal disease in sheep 1153*
Shark: See *Carcharhinus milberti*
Sheep, serum-citrate levels and periodontal disease in 1153*
Sialadenectomy, effects of, on plasmatic sialic acid concentration in rats 1076*
Sialic acid and acid glycosaminoglycans content in salivary glands of rats 555
Sight and sound, response to, in a simulated dental procedure 160††
Silicate cements: See Cements, dental
Simulated dental procedure, response to sight and sound in a 160††
Skeletal retention and anticariogenic efficacy of fluoride when administered in the presence of a prenatal vitamin-mineral supplement 1224
Skin wounds, healing of, with butyl cyanoacrylate 294
Skin-calcifying system, studies on a 1096*
Sliding flaps, lateral: a biometric study 1070*
Small vessel calcification in human nondiabetic and diabetic gingival biopsy specimens, a histochemical evaluation for 968††
Sodium chloride concentration, in vivo and in vitro determination of the potentials developed at the enamel surface, with particular reference to 1087*
Sodium (1%) dihydrogen phosphate and disodium hydrogen phosphate added to presweetened breakfast cereals, North Dakota field test of cariostatic effect of 1308††
Sodium fluoride: See Fluoride, sodium; Fluoridation
Sodium monofluorophosphate and stannous fluoride toothpastes, clinical testing of; radiological findings 1128*
Sodium phosphate (^{32}P), radioactive, bone remodeling dynamics after intraperitoneal administration of 909
Sodium trimetaphosphate: See Trimetaphosphate, sodium
Soft oral structures, effects of Halidor on 484††
Soft palate: See Palate, soft
Soldiers, preliminary observation of oral hygiene and periodontal condition in 1070*
Sound and sight, response to, in a simulated dental procedure 160††
Spice extracts, in vitro effects of, on acid formation and enamel solubility 916
Spirochetes, oral, the in vitro sensitivity of, to metronidazole 1101*
Splinting, fixed, bone regeneration in periodontium after 1070*
Squamous carcinoma: See Carcinoma, squamous
Stainless steel orthodontic brackets, investigations on the adhesion of, to dental enamel 1156*
Stannous fluoride
and sodium monofluorophosphate toothpastes, clinical testing of; radiological findings 1128*
incidence of dental caries in children after topical applications 1068*
Steroids, contraceptive, effect of some, on growth and development of salivary glands and incidence of dental caries in female rats 477
Stomatitis, denture
the distribution of *Candida* in 1122*
the incidence of delayed hypersensitivity to *Candida albicans* in patients with 1134*
Stone(s): See Dental stone; Die stones

streptococci, cariogenic fluorescent antibody (FAB) identification of 1106*
human and rat, in dentin, cross-reactivity of 488††
study of some factors influencing phagocytosis of, by caries-free and caries-active individuals 842
Streptococci, oral
cariogenic and other, taxonomy of 1105*
on cereal substrates, acids produced by 928
Streptococcus No. 167, cariogenic potential of, in germ-free rats 1313††
"Stretch factor" in soft palate function 972††
Sublingual glands: See Glands, parotid and sublingual
Submandibular glands: See Glands—submandibular
Submaxillary fluid, adrenal corticosteroids in 448
Submaxillary gland: See Gland, submaxillary
Submaxillary secretions, human parotid and. Salivary excretions of lithium: I. 546
Suckling dogs: See Dogs, suckling
Sugar and sugar with added phosphate, changes in plaque phosphate levels during ingestion of 1115*
Sugars, different, the production of extracellular polysaccharides by oral organisms from 1107*
Supernumeraries of the maxilla, features associated with failure of central incisor eruption in cases with 1125*
Surface hardness of die stones, factors influencing the 1110*
Sympathetic nerve trunks, submandibular, degenerative changes in, after superior cervical ganglionectomy 1126*
Sympathetic nerves in oral tissue 1084*

99Tc uptake by submaxillary and thyroid glands in A_2G mice 1076*
Table-salt fluoridation in Hungary 153††
Taxonomy of cariogenic and other oral streptococci 1105*
Teaching program in oral hygiene instruction, an assessment of a child-centered 1133*
Teeth
and cast, vertical movement of the, during packing 1073*
carious and noncarious, crystallographic evaluation of enamel from 1280
cells of developing, ^{3}H-proline uptake by the 257
clinically normal, ultrastructural carious lesions in 1145*
comparison of buccal and lingual pressures acting on 1131*
congenitally absent, in medieval Danes, incidence of 1125*
detection of trace elements in, by neutron activation and high-resolution gamma-ray spectrometry 1158*
developing, mechanisms controlling morphogenesis in 726
development and eruption of, in rhesus monkeys, patterns of root and alveolar-bone growth associated with 251
hamster, periodontally diseased, some effects of orthodontic tooth movement in 1160T
homologous, time interval between the eruption of 291
in rhesus monkeys, cellular dynamics in root formation of 114
mesial migration of, the effect of the cheek and tongue on the 1096*
molar, of young rats, the effect of analogues of tetracycline on the 1090*
mottled, electron probe microanalysis of noncarious enamel and dentin and calcified tissues in 131
normal and lathyritic, of the rat, autoradiographic study on the incorporation of ^{3}H-proline into 1148*
unerupted and erupted, citrate in the surface enamel of 105
Teeth, deciduous
comparison of the effects of early feeding habits on the caries prevalence of 1124*
of twins, prevalence of caries in 1068*
prevalence of dental caries in 1067*
Teeth, human
in vitro, uptake and release of fluoride after topical fluoride applications on 1148*
variation in form of:
I. An anthropologic and forensic study of maxillary incisors 5
II. An anthropologic and forensic study of maxillary canines 173
Telemetry, oral, of fluoride-ion activity 1087*
Temperature and light, effect of combinations of, upon skeletal development and the growth rate of incisors in rats 461
Temporalis muscle in the cat, electrophysiologic analysis of innervation of 327††
Temporary restorations, clinical studies of dental cements: II. Further investigation of two zinc oxide-eugenol cements for 366
Temporomandibular joint
morphology in natives of Southern Argentina, occlusal influence on 1075*
radiographic study of the 1075*
Temporomandibular joint patients, treated, perception of mandibular posture in 1069*
Tensile and impact forces, the effect of, on crown posts 1122*
Tensile specimen for dental casting gold alloys, improved 278
Tensile strength of dental cements and amalgam, studies on the 1111*
Teratology, experimental
normal and abnormal growth and differentiation of the palate 1160T
types of experiments and mechanisms involving cleft palate production 1160T
Testosterone propionate, castration, and parasympathetic denervation on the submaxillary glands in C_3H mice, effects of 1077*
Tetracycline
and ^{45}Ca in quantitative studies of mandibular growth in the rat 1136*
effect of analogues of, on the molar teeth of young rats 1090*
electron microscopy of the calciotraumatic response in rat incisor dentin and bone to parenteral and oral administration of 521
labeling of reparative dentin 154††

localization of, in rat parotid and sublingual glands 932
Tetracycline-L-metilenlysine and calcium hydroxide, effect of, on healthy, experimentally exposed rat molar pulps 1080*
Third-molar eruption, growth, and dental caries in rats, influence of marginal and complete protein deficiency for varying periods during reproduction on 310
Thymidine-^{3}H study of developing tooth germs and osteogenic tissue 753
Thyrocalcitonin, evidence of, in guinea pig and its effects on maternal-fetal calcium relationships 307
Thyroid, medulary carcinoma of the, in a patient with bilateral pheochromocytoma, a case of 1149T
Time interval between the eruption of homologous teeth 291
Time-structure relationship of tooth development in human embryogenesis 745
Tin-copper phases in dental amalgam, microanalysis of 872
Tissue(s)
calcified, investigations into the nature of the fluorescent material in 1108*
epithelial, in male rats, selected autoradiographic demonstration of DNA synthesis in 1219
fluids, the composition of the developing deciduous dentition in relation to fluoride in 761
hard, apatitic nuclei in, and salivary stone formation analyzed by electron microscopy and diffraction 1140*
hard and soft, a technic for the preservation of, in undecalcified microscopic preparations 1085*
oral, sympathetic nerves in 1084*
osteogenic, thymidine-^{3}H study of developing tooth germs and 753
plasminogen in normal and inflamed human gingiva 603††
reaction to root canal fillings with plastic cements 1080*
response to a dental cement containing butyl cyanoacrylate 57
Tissue, connective
and epithelium, relationship between, in gingival inflammation 625
epithelial, junction as seen after enzymatic digestion 630
fiber-water interface, physiological and pathological implications 676
ground substances, degradation phenomena of 1139*
in oral mucous membranes, anchoring fibrils in the attachment of epithelium to 144
some effects of molybdenum on 1290
some quantum aspects of the protein intermolecular interfaces in 661
Tissue culture
Mikulicz's recurrent oral aphthae: effect of sera and lymphocytes upon oral epithelial cells in 1134*
tooth germs of albino rats cultivated in 1138*
Tissues, periodontal: See Periodontal tissues
Tongue and cheek, the effect of the, on the mesial migration of teeth 1096*
Tooth
bioelectric properties of the 789
grafts, conservation of, in hyperbaric oxygen 487††
loss and prosthetic status in a British adult population 1125*
mobility, the effect on, of norepinephrine injected locally 1132*
model, linear force-displacement, numerical experiments with a 32
movement 1156*
movement, orthodontic, some effects of, in periodontically diseased hamster teeth 1160T
resorbtion, inhibition of, by fluoride after implantation 1149T
root surface of a, copper localization on the 970††
Tooth contact
changes in the activity of the masseter muscle following 1131*
role of muscle spindles in the response of the masseter muscle to 1131*
Tooth, deciduous
gingival emergence, dental eruption chronology in dogs: 1177
root canal topography 1074*
Tooth development
early, inductive changes in: I. A study of mouse tooth development on the chick chorioallantois 719
in human embryogenesis, the time-structure relationship of 745
Tooth germs
developing, and osteogenic tissue, thymidine-^{3}H study of 753
of albino rats cultivated in tissue culture 1138*
Tooth surface
interaction of salivary proteins with 818
sites, bacterial populations of selected 67
Tooth-amalgam interface, analyses of the, using the electron microprobe 317
Tooth-eruption ages in suckling dogs as affected by local heating 427
Tooth-saliva interface in periodontal disease, biological changes at the 846
Toothpastes, stannous fluoride and sodium monofluorophosphate, clinical testing of; radiological findings 1128*
Topical fluorides: See entries for Fluoride and combinations
Trace elements in teeth, the detection of, by neutron activation and high-resolution gamma-ray spectrometry 1158*
Trauma from occlusion and orthodontic movement, combined effect of, in periodontal bone response 1082*
Trimetaphosphate, sodium, and sodium fluoride, longitudinal study of cariostatic effects of, when fed separately and together in diets of rats 183
Triphosphates, adenosine: See Adenosine triphosphatase
Trisomy 21 (mongolism)
and other congenitally mentally defective persons, whole and parotid saliva composition in 1151*
periodontal disease and blood citrate levels in patients with 1231

prevalence of dental disease in 1150*
Trioxymethylene paste root canal treatment, periapical reactions to 1080*
Tumors
in the rat submandibular gland, incidence of induced, with different doses of 7,12-dimethylbenz-(α)-anthracene 1316††
mixed, of the salivary glands, histochemic and histoenzymologic characteristics of the 1143*
Turbine, dental, causes of noise 1073*
Turbines, dental, noise of the "noiseless" 1073*
Turner's syndrome, maximum palatal height in patients with 473
Twins
prevalence of caries in deciduous teeth of 1068*
second premolar morphologic trait similarities in 74

Ultrasound, the effect of, on healing of bone fractures 1081*
Ultrastructure of cytoplasmic changes in secretory ameloblasts 1075*
Unconscious aspects of odonto-pediatric treatment detected through combined dental-psychological treatment 1068*
Unerupted and erupted teeth, citrate in the surface enamel of 105
Urease, the inhibition of, by fluoride in vitro 1146*
Urinary and blood fluoride levels in humans associated with ingestion of sodium fluoride-containing vitamin tablets 1211
Utah, Monument Valley, incidence of dental disease among the Navajo Indians of 328††

Vascular changes in irradiated wounds, quantitative studies 1081*
Vascular pulpal lesions induced through severe hypoxia in the rat 1141*
Video-simulated psychologic stress in a dental restoration 444
Viruses and antibodies, the case for. Some new approaches to cleft palate research: 1160T
Vitamin tablets, sodium fluoride-containing, blood and urinary fluoride levels in humans associated with ingestion of 1211
Vitamin-A deficiency, prolonged, progressive atrophy and expulsion of upper rat incisor after 330††
Vitamin-mineral supplement, a prenatal, skeletal retention and anticariogenic efficacy of fluoride when administered in the presence of 1224
Vitamins: See B Vitamins

Wax
modeling, solid-phase relationships of the main constituents of 1110*
paraffin, infiltrating histologic specimens with, under vacuum: basic factors and a new approach 1118*
Waxes, commercial and dental, calorimetric analysis of 1165
Women, pregnant, periodontal conditions and blood citrate in 140
Wound, healing, the effect of different types of periodontal surgical dressings on the bacterial flora of the 1104*
Wounds
of the mandible, inhibition of osteogenesis in, by vital periodontal ligament 1102*
skin, healing of, with butyl cyanoacrylate 294
Wounds, irradiated
mast cells in healing of 1081*
vascular changes in, quantitative studies 1081*
Woven and endochondral bone: See Bone—woven and endochondral

X irradiation, local, bone-remodeling dynamics following:
I. 376
II. 904
X radiation, effects of low level, on the mitotic index of hamster basal epithelial cells in vivo 1049
X-ray
cephalometry, three-view, of primates 1312††
study of the demineralization of human dental enamel 1127*
survey of edentulous jaws 1069*
X-ray diffraction
analysis of dental porcelain 543
and electron probe microanalyses of human dental enamel treated in vitro by fluoride solution 1145*
setting reactions of gypsum materials investigated by 43
X-ray-opaque reinforcing fillers for composite materials 79
Xylocaine, biologic behavior of, on cell cultures 1146*

Zinc oxide-eugenol
cements for temporary restorations, further investigation of two. Clinical studies of dental cements: II. 366
reaction of human dental pulp covered with calxyl with or without 1149T
Zygomatic arch, growth of the zygomaticomaxillary suture in pigs after sectioning the 573
Zygomaticomaxillary suture in pigs, growth of the, after sectioning the zygomatic arch 573
